PROFILE SUMMARY

Data analyst with 4+ years cross-functional experience and a portfolio of Power BI, SQL and BigQuery projects; immediate availability to start, willing to relocate, and holding a valid German work visa. I deliver operational reporting, ETL monitoring, and automated dashboards that improve platform visibility and decision-making across finance and sales domains.

PROFESSIONAL EXPERIENCE

IT Project Analyst - IT Asset & Reporting Analytics

01/2023 - 07/2025

TCS Deutschland (Client: Microsoft Deutschland) · IT Services · Enterprise Operations · Financial Reporting

- Designed and maintained structured **IT asset reporting datasets** using **SQL and Excel**, improving reporting accuracy by 30%.
- Prepared monthly **IT asset reports** for the **Finance team**, tracking assets procured, repurposed, and recycled to ensure **cost visibility and lifecycle compliance**.
- Built **procurement forecasting models** based on **historical order data** to support data-driven **purchasing decisions**.
- Automated reporting workflows using **Power Query and VBA**, reducing manual effort by 60%.
- Conducted **telecom tariff data analysis**, identifying **cost optimisation opportunities** and reducing unnecessary expense allocation.
- JD Fit:** Experience in platform-focused operational reporting, automated ETL checks and incident resolution for production reporting pipelines.

Data & Inventory Analyst (Voluntary)

12/2021 - 12/2022

Flink · E-Commerce · FMCG · Quick Commerce

- Developed rider retention analyses underpinning **operational strategy for hub management**, supporting data-driven workforce allocation initiatives.
- Produced structured **operational performance** reports tracking fulfilment rates, contributing to a **20% uplift in hub efficiency**.
- Ensured integrity of internal reporting datasets through systematic data quality audits, maintaining reliable visibility for commercial and supply teams.
- JD Fit:** Hands-on monitoring of batch processes and data loads, with operational KPI design and data validation experience.

Market Research & Commercial Intelligence Intern

03/2020 - 09/2020

BASF New Business GmbH · B2B · Chemical Industry · Strategy & Business Development

- Built **quantitative Excel dashboards** for competitive benchmarking and market sizing, reducing senior management research consolidation time by ~25%.
- Aggregated and structured data from **PitchBook, Crunchbase, and Capital IQ** to produce commercial strategy reports informing partnership decisions.
- Supported **go-to-market analysis** by profiling **customer segments** across **target B2B industries**, directly contributing to **new business recommendations**.
- JD Fit:** Experience translating data into actionable dashboards and stakeholder-facing reports; strong cross-functional communication.

ANALYTICS PROJECTS

Business Insights 360 - Integrated Commercial Reporting · Power BI · Finance · Sales · Marketing · Supply Chain

- Replaced siloed Excel files with a unified real-time Power BI platform covering Finance P&L, Sales funnel performance, Marketing ROI, and Supply Chain KPIs cutting report generation time by 60% and enabling integrated cross-functional decision-making.
- JD Fit:** Built operational dashboards and monitoring logic that support platform stability and cross-functional incident detection.

SQL Analytics Solution - Finance & Sales Intelligence · MySQL · BigQuery · 1M+ Records · Stored Procedures

- Designed and queried a multi-domain analytics layer across sales, finance, and supply chain data (1M+ records), delivering market expansion insights and regional margin analyses that guided procurement and revenue strategy.
- Implemented stored procedures and window functions for scalable KPI calculations.
- **JD Fit:** Strong SQL proficiency for complex joins, aggregations, CTEs and performance tuning relevant to platform data monitoring.

Exploratory Data Analysis - Sales Dataset · Python · Pandas · Matplotlib

- Performed structured exploratory analysis on transactional sales data to identify revenue seasonality and product performance trends.
- Applied statistical summaries and distribution analysis to detect margin variability.
- Delivered visual insights supporting commercial performance evaluation.
- **JD Fit:** Analytical approach to root-cause analysis and anomaly detection in transactional data streams.

Sales & Margin Performance Model · Advanced Excel · Pivot Tables · Scenario Analysis

- Developed dynamic Excel model tracking Revenue, Discounts, Net Sales, COGS, and Gross Margin across regions.
- Conducted forecast vs actual variance analysis to evaluate financial performance deviations.
- Automated KPI reporting using structured Pivot models and sensitivity analysis.
- **JD Fit:** Experience in SLA-oriented KPI monitoring and communicating variance to stakeholders.

End-to-End Data Warehouse - Product & Customer Insights · MS SQL Server · Star schema · CTE · Stored Procedures

- Built an end-to-end SQL Server data warehouse, centralising raw data from multiple sources into a structured schema for scalable BI.
- Implemented complex analytical logic (CTEs, window functions) and optimised performance through indexing.
- Developed automated reporting views for customer segmentation and business-critical performance analysis.
- **JD-Fit:** Designed source-to-target data flows and a star-schema model migrating raw data into a structured warehouse — covers source-to-target mapping, data modelling and migration.

CORE SKILLS

- **Platform & Operations:** IT operations support; production reporting; incident investigation; change/release coordination; ETL monitoring; SLA; MTTR; Customer Data Platform.
- **Data & Analytics:** SQL (CTEs, window functions, aggregations); ETL/ELT; data validation; data cleansing.
- **Reporting & BI:** Power BI (DAX, data modelling, row-level security); Looker Studio; Tableau-style dashboard design principles; ServiceNow.
- **Programming / Automation:** Python (Pandas, NumPy); Excel (Power Query, VBA, Pivot Tables).
- **Finance & Business:** P&L reporting; variance analysis; revenue forecasting; commercial stakeholder reporting.
- **Soft Skills:** Problem solving; analytical thinking; stakeholder communication; cross-functional collaboration.

EDUCATION

M.E. International Business & Engineering

2018 - 2021

SRH Hochschule Heidelberg, Heidelberg, Germany

B.E. Mechanical Engineering

2013 - 2017

NIE Institute of Technology, India

CERTIFICATIONS & TRAINING

In Progress: Codebasics Data Analytics Bootcamp 3.0

Completed: Google Data Analytics Professional Certificate (Coursera)

LANGUAGES

German: B2 - Advanced · Professional Business Communication

English: C1 - Fluent · Full Professional Proficiency
